

CGI Trade360

Get ahead of the curve in global trade finance

We have the ability to turn to CGI and ask them to modify the solution or to roll out new products for us—even for individual clients. CGI has given us the ability to quickly introduce new offerings that enable our business strategy and keep us ahead of the evolving market.

Mark Evans

Global Head of Trade and Supply Chain Australia and New Zealand Banking Group

When your customer says, "I want my bank to ..." Can your bank meet the need?

Get ahead of the curve in global trade finance with CGI Trade360, the fully-integrated software-as-a-service that starts with your customers in mind. CGI Trade360 gives you the power to meet everevolving customer needs and deliver exceptional service with the most robust functionality and technology in the market. It significantly reduces total cost of ownership with all of the software, hardware and services needed to run a global trade business delivered from CGI's private, highly secured community cloud. With an on-going and active role in the CGI Trade360 client community, you can stay ahead of the curve by driving future enhancements that align with the direction of your customers and your bank.

Moving

at the speed of change

Change is the only constant in today's global trade marketplace. New regulations and intense competition are putting pressure on both prices and costs. Corporate customers are demanding an ever broadening set of trade solutions that go beyond traditional buyer risk mitigation to address their financial supply chain more holistically, including working capital optimisation, liquidity management support, processing services and risk management. Buyers and sellers want to work with banks providing innovative new services to make supply chains more financially efficient. At the same time, fragmented legacy trade technologies at many banks cannot keep pace with this rapid market transformation. Additionally, traditional technology upgrades take significant capital investment and delay time to market. Banks need a solution that is as quick and nimble as the market itself. That solution is the CGI Trade360 global transaction service, the only fully integrated software-asa-service for global trade finance.

The CGI Trade360 global transaction service supports the needs of your customers and your bank.

Achieve bank objectives for:

 Having a broad set of offerings

Meet customers' needs for:

- Mitigating risk
- Working capital optimisation
- Providing a seamless experience and helpful support
- Managing their transaction business globally
- Accessing information about their trade activity across their global footprint
- Relevant solutions brought to market quickly
- Ease of interaction with the bank
- Ease of integration with other systems

cgi-group.co.uk

- Revenue generation
- Operational efficiency
- Lower total cost of ownership and better cost predictability

- investment

BMO has processed trade finance transactions over the Trade360 platform for more than 15 years. By working collaboratively with CGI and other Trade360 client banks we leverage our combined knowledge and experience, share development costs and spread risk associated with technology development.

Peter Grills, Managing Director Gobal Trade BMO Capital Markets

Multiple awards

for best trade finance bank

Australia and New Zealand (ANZ)
Bank, which uses CGI Trade360 in 34
countries, has been recognised with
multiple trade awards for excellence
across the Asia Pacific.

ANZ experienced:

- 50% improvement in operational efficiency
- 30% increase in transaction throughput (with the same number of staff).

Customer benefits

When your customers say, "I want my bank to ..."

- ... listen to my problems and quickly provide relevant solutions
 CGI Trade360 gives your account teams the broadest range of solutions to
 meet customer needs for mitigating buyer risk, optimising working capital,
 supporting liquidity management and increasing process efficiencies.
- ... give me what I need in a single, easy-to-use portal
 CGI Trade360 allows you to seamlessly present customers with the full range
 of your solutions, all in one place—across products and geographies—so
 they don't have to navigate different bank organisations or technologies.
- ... provide consistent service, wherever I do business with the bank CGI Trade360 lets you match your customers' local and global needs with a single global platform that configures to meet local standards, a fully synchronised corporate Portal and bank defined standards for consistent service globally.
- ... answer my questions and guide me through transactions when I need help CGI Trade360 gives your customer service representatives instant online access to complete customer activity, as well as access to a customer's Portal transactions to provide realtime assistance.
- ... mitigate my risk of customer non-payment

CGI Trade360 offers robust products to mitigate buyer payment risk, including Letters of Credit, Collections and Direct Send Collections.

- ... manage, finance and utilise Letters of Credit in my favor

 CGI Trade360 fully supports the advice of LCs, transfers, assignment of proceeds, export finance, presentation, examination, discrepancy handling, payments, bankers acceptances, deferred payments and letters of indemnity.
- ... offer options for me to provide invoice data, PO data and payment files CGI Trade360 provides Portal and host-to-host API-driven integration options for uploading customised PO and invoice data for traditional trade, payables and receivables solutions, and payment files for cash management.
- ... increase my efficiency

CGI Trade360 provides many efficiencies through automated workflow and imaging between the customer and the bank, streamlined usability in the Portal and processing services that remove work from the corporate back-office.

- ... make it easy to integrate trade finance with my other systems CGI Trade360 interoperates with customer ERP and collaboration platforms for maximum efficiency.
- ... empower me to report across all transactions in real-time

 CGI Trade360 enables your customers to report in real-time on transactions

 processed for all organisational units, and to customise reports to meet their

 needs.

Bank benefits

When the bank needs to...

... get to revenue faster CGI Trade360 enables faster time to solution, which also speeds time to revenue. Continually adding new offerings gives the bank always-current functionality. The bank can also employ out-of-the-box insourcing capabilities to increase revenues.

... offer new solutions to meet emerging customer needs

With CGI Trade360, the bank can move beyond traditional products to support its customer's supply chain needs including open account, payables, receivables and cash management.

... upgrade technology

A continuous stream of new functionality with CGI Trade360 keeps the bank up to date with innovative new services, anywhere, anytime. New releases are delivered directly to production, without the bank having to justify, fund or staff an upgrade project internally.

... enhance customer service

Through the CGI Trade360 Portal and customer service centre capabilities, the bank can create a seamless bank-branded experience globally, complete with industry leading service level agreements. Customers will stay and grow with the bank as they continually receive services that meet their needs.

... reduce total cost of ownership (TCO)

With CGI Trade360, the bank can modernise without capital costs because all software, infrastructure and support are provided as a service by CGI in a private, highly secure community cloud. TCO is also reduced by a shared cost model, the ability to scale operations across the bank, streamlined operations, easier integration and included functional upgrades.

... mitigate risk

Gain single provider accountability for all technology and infrastructure and integrated compliance checking.

... free up bank resources

With CGI handling platform operations, development, maintenance and upgrades, the bank can focus on its core competencies.

... stay ahead of the curve

Actively drive enhancements to CGI Trade360 that align with your business strategy and keep you ahead of the curve. CGI and the CGI Trade360 client community work together closely to set solution strategy, direction and priorities.

Using CGI Trade360, Bank of Montreal has been able to realise:

- Increased revenues from insourcing other banks
- 60% reduction in operating staff
- 50% increase in client servicing
- Significant market gains in Open Account.

keys to success governance, collaboration, services, technology

Additional CGI Trade360 features

- Integration accelerator for faster implementations
- Flexible service and operating models
- Dedicated trade and platform experts
- Single point of integration
- Ease of implementation
- Out-of-the-box insourcing of other banks

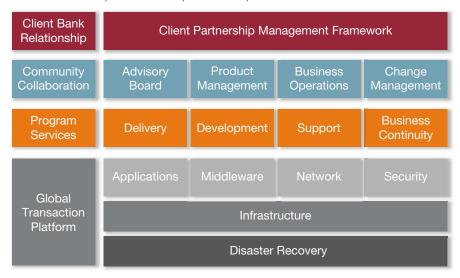

CGI Trade360

All you need to power your global trade business

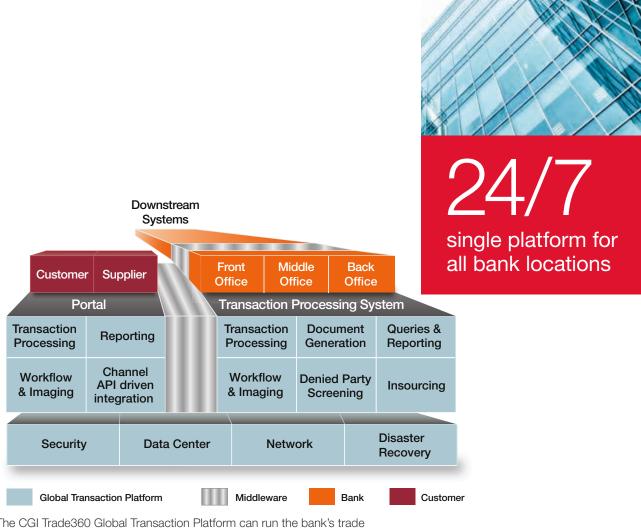

As a fully integrated global transaction service, CGI Trade360 includes all of the applications, infrastructure and support you need to run a global trade business—delivered from CGI's private, highly secure, community cloud. Take advantage of robust functionality to drive revenue, reduce costs and eliminate risks while leaving the management of upgrades, hardware and other costly and time-consuming activities to CGI.

CGI Trade360 Global Transaction Service

CGI Trade360 comprises four unique and comprehensive elements:

- Client Bank Relationship—CGI's Client Partnership Management
 Framework dictates that client objectives are clearly defined, projects and
 operations are properly scoped, and appropriate resources are applied to
 meet objectives on-time and on-budget.
- Community Collaboration—The CGI Trade360 client community is actively involved in setting solution strategy, direction and priorities. Your participation in this dynamic community will help drive enhancements that align with customer needs and bank direction.
- Program Services—CGI simplifies CGI Trade360 implementations with a robust set of implementation services, including: set up, integration and conversion. Ongoing services include application development, frequent releases that are delivered directly into production, maintenance, support and business continuity support.
- Global Transaction Platform—Built uniquely for global multi-bank, multicurrency processing, the CGI Trade360 Global Transaction Platform is comprised of a back-office Transaction Processing System, customer and supplier Portals, XML-based API-driven integration architecture, as well as scalable, world-class infrastructure provided in secure, geographically dispersed data centres.

The CGI Trade360 Global Transaction Platform can run the bank's trade and open account business globally on a single 24/7 platform. The system includes:

- Portal—A redesigned, fully-integrated bank-branded Portal for transaction management, messaging and robust reporting is always synchronised with the backend Transaction Processing System.
 The Supplier Portal also includes an on-demand invoice offer and purchase requests for approved payables finance.
- Transaction Processing System—Processes transactions initiated in the Portal, other electronic channels (e.g., SWIFT, customer integration, etc.) or from the bank's service centres. Orchestrates workflow and rules-based processing across the entire platform. Capabilities include transaction processing, workflow, document generation, reporting, denied party screening and insourcing.
- Middleware—Integrates the Transaction Processing System with the Portal, the bank's downstream systems and corporate customers' internal systems.
- **Scalable, world-class infrastructure**—Features data centres and network operations with bank-grade security and disaster recovery.

Unmatched breadth of customer offerings

CGI Trade360 allows banks to offer the most robust set of trade and open account services anywhere, anytime, including Traditional Trade, Payables, Receivables and Cash Management solutions at no additional cost, since you only pay for what you use.
