

# Working with SMEs to deliver secure cloud to government

## Hey, you, come on to my cloud

...as the Rolling Stones almost had it. Okay, our Secure Government Cloud (SGC) may not offer meet-and-greet opportunities with Mick Jagger, but it has pretty much everything else a public sector client could be looking for. And now we're looking for SMEs who can help us take cloud further.

We offer SGC to public sector organisations who want the best that cloud can offer backed up by the strongest security controls. CGI's Secure Government Cloud provides secure cloud services with PGA accreditation to OFFICIAL for connection to PSN in a way that's both flexible to changes in levels of demand and cost-effective. New to our offering is the CGI Commercial Cloud (CCC), a self-asserted OFFICIAL platform which shares the same reference architecture as the SGC and provides connectivity to secure and hybrid services across the internet. It's a family of platforms that offer our full range of cloud services backed up by our UK-based, award-winning, five-star service desk and UK-based Managed Support Services.

With CGI Clouds our public sector clients choose the modular service components that meet their needs, applications or security requirements safe in the knowledge that they're using an industry-leading solution. And it's an area of great success: CGI won the Frost & Sullivan North American Government Cloud Solutions Company

of the Year Award for 2013 for its "strong commitment and capabilities to help its government clients evaluate, implement, and manage cloud solutions more easily, successfully, and cost-effectively".

What sets us apart from our competition is our commitment to working in partnership with SMEs to give both our public sector clients and our commercial clients access to the very best of SME innovation. Our bespoke programme, SME Accelerate, puts public sector organisations in touch with the grassroots creativity that bubbles out of SMEs, and backs it up with our experience to produce a solution that precisely meets the client's requirements. Increasingly, we are seeing the same pull from our clients in the commercial sector.

Fancy being a part of this? We're always eager to hear from SMEs who can help us exploit or extend the cloud. If you think you have an area of expertise to offer, please get in touch with the SME Accelerate programme today. Alternatively, for more information contact Simon Telfer or Sophie Ellis to talk things through.

## Focus

### SME Accelerate and Secure Government Cloud

Founded in 1976, CGI is a global IT and business process services provider with 68,000 professionals delivering high-quality business consulting, systems integration and managed services.
