

Tomorrow, today.

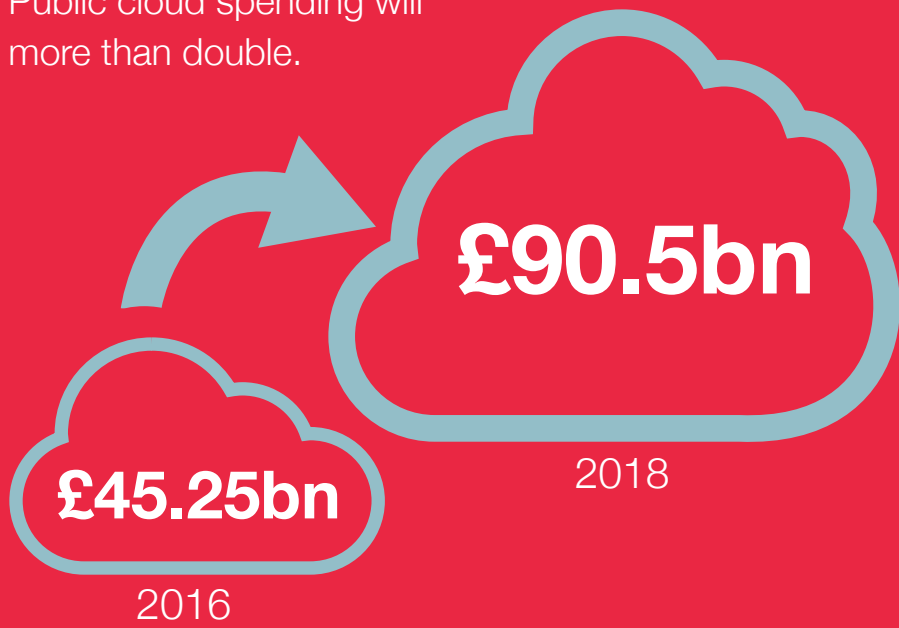

It's time to get a different view of the cloud

IT is shifting to the cloud

By 2018, **78%**
of IT workloads will be
processed in cloud
data centres.

Public cloud spending will
more than double.

Yet businesses are holding back from cloud adoption

73%
have security
concerns

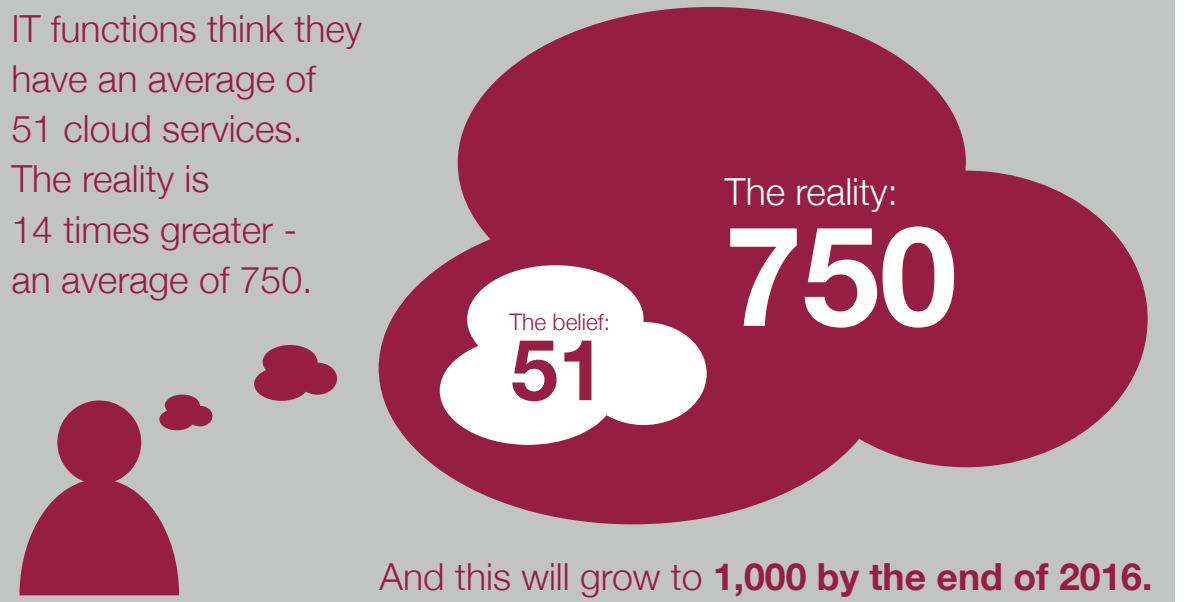

72%
have cloud
shadow IT concerns

38%
have concerns about
regulatory compliance

Without control, shadow IT in the cloud will get worse

IT functions think they
have an average of
51 cloud services.
The reality is
14 times greater -
an average of 750.

Our unified approach to cloud management helps you to get the most from the cloud, securely.

CGI Unify360 and Cloud Brokerage services will help you:

- Discover** Establish an IT roadmap that aligns with your business objectives
- Simplify** Identify and include only the services and applications you need
- Transform** Access expert guidance to transition workloads to the cloud

- Manage** Operate, secure and govern all your IT from a single platform
- Maximise** Efficiently integrate legacy IT with the cloud
- Secure** Get a holistic view of your entire IT estate, making it easier to spot attacks
